Cancel · keep saved value

35 / Water completion

10:22

That counts.
A moment for yourself, a little progress.

Water complete
2 litres, one small routine
+10 XP

Level 13
1,250 XP total
50 / 100 XP toward Level 14

Back to today

Missed days never erase what you have learned.

36 / Meditation paused timer

10:22

Pause at your pace
Meditation · your elapsed time is preserved

06:00 / 10:00
Resume

Timer paused
6 minutes are saved in the draft. Nothing is logged until you finish and save.

Resume timer

Save progress and finish

Returning to Today keeps partial progress.
No completion XP before the 10-minute target.

HABIT DESIGN SYSTEM / 1

Principles and brand

Small steps, real progress
Make logging one tap. A missed day is neutral, never a shame message.

Private by default
History and exports belong to the owner. No public routines or competitive pressure.

Honest system status
Local saved is not server synced. Queued XP is provisional; freezes are not check-ins.

Native consistency
Reusable variants, semantic variables and shared text styles govern the visual language.

Clear recovery
Preserve entered text. Explain what to fix and what happens next.

Diverse routines
Yes/no, quantity and duration share hierarchy, while retaining the right unit and rules.

A missed day is a pause, not a failure.

Prefer: Start again. Review one change. Saved on this device.
Avoid: You failed. Your streak is ruined. Don't lose everything.

Local reusable design assets. Publishing and working interaction wiring are separate steps.

Behavior contract

Default: available action. Pressed: transient pointer feedback. Focus: visible keyboard or accessibility focus. Disabled: unavailable, never a duplicate request. Loading: busy indicator, retain label and prevent repeat submission.

Destructive actions require explicit confirmation. Primary is the single dominant action. Secondary is safe return/cancel. Tertiary links never disguise a destructive action.

These are native reusable visual variants, not wired interactions.

Offline cards retain local values. Conflict cards require reviewed resolution. No card fabricates a server-confirmed reward.

HABIT DESIGN SYSTEM / 7

Progress and habit data

Every data state carries a symbol or explicit text, never color alone.

Status: Complete · Status: Protected · Status: Missed · Status: NotDue · Status: Pending

State: Partial — Daily progress 60%
State: Complete — Daily progress 100%
State: Queued — Daily progress 60% queued

State: Confirmed — Level 13 · 1,250 XP · 50 / 100 XP toward Level 14
State: Default — 76% · 95 / 125 eligible periods

Balance: Available — 1 / 2 freezes — Next refill: 1 June · up to 2 total — Protect continuity, not a pretend check-in.
Balance: Empty — 0 / 2 freezes — Your next refill is 1 June. — Protect continuity, not a pretend check-in.

Context: NoHabits — No habits yet — Start with one small routine.
Context: NoSearchResults — No matches this time — Try another name or category.

Period rules: a freeze is not completion. Open periods are pending. Not-due and archived dates do not enter the denominator.

HABIT DESIGN SYSTEM / 8

Icons accessibility and content

24px thin-line icons live inside ≥44px targets. Keep semantic meanings stable.

back · menu · home · calendar · chart · user · check
plus · clock · freeze · water · book · bell · leaf

Avatar · 24 · Avatar · 40 · Avatar · 80

Contrast	Body text ≥4.5:1, large text ≥3:1. Disabled states are clearly unavailable.
Dynamic type	Wrap meaningful labels and error messages. Grow surfaces rather than clipping text.
Focus and keyboard	Visible focus border; order matches hierarchy. Focus is a static specimen, not a wired action.
Validation	Persistent label + precise helper. Keep values when another field is invalid.
Destructive actions	Confirm deletion, show consequences and reauthenticate. Safe cancel is easy to find.
Localization	Allow 30–50% label expansion. Locale-aware dates, units and IANA timezone rules.
Offline honesty	Saved locally is not synced. Provisional progress stays distinct from confirmed rewards.

These are reusable native components and documented design states. They do not make buttons or links functional.

Interaction handoff — not a wired prototype

Action → destination → guard → resulting state. Screen data must bind to the current habit and server response, not hard-coded examples.

01 · Access and onboarding

Documented routes and resulting states. No click/tap wiring is attached.

01 Welcome → 03 Create account → 04 Setup → 05 Today / 23 Empty

Source	Action / trigger	Destination + guard + expected state
01	Start your journey / Sign in	03 account form / 02 sign in.
02	Sign in	Valid credentials →04 on first setup, otherwise05 or23. Errors stay02; keep email.
02	Forgot password / Create account	25 reset request /03 account form.
03	Create account	Valid form +201 →04. Invalid →03 with field errors; no account success fabricated.
03	Terms and Privacy Policy	External configured policy documents; no fabricated URLs or account data shared.
04	Pacific Time → Edit	Timezone selection state on04; validated IANA choice, future-effective dates.
04	Follow device timezone	Edit preference, ask before zone change; never rewrite historical dates.
04	Allow reminders	OS permission prompt →04 actual permission result. Denial is not success.
04	Continue / reminders later	05 with routines, or23 first-run empty Today.
25	Send reset link	202 uniform response →26 email sent; never reveal whether address exists.
26	Back to sign in / Resend	02 /26 after cooldown. External valid email link opens27.
27	Save new password	Passwords match and token valid →02 with success feedback. Expired link →25; invalid fields stay27.
Global	Back and authentication guard	Return to originating screen; unsaved draft prompts Stay/Discard. Expired protected session →02; preserve owner-scoped local queue.

IMPLEMENTATION CONTRACT · Every back route preserves the correct origin; every state binds real resource data.

02 · Check-ins, quantities and timers

Documented routes and resulting states. No click/tap wiring is attached.

05 Today → 34 Amount / 33 Timer → 06 / 35 Reward → 05 Updated today

Source	Action / trigger	Destination + guard + expected state
05	Yes/no habit check / undo	Persist local binary mutation once. Provisional status until sync. New confirmed completion +10 XP; undo reverses entitlement.
05	Water +250 mL / open amount	Inline increment, or34 quantity draft. Unit and target bound to selected habit.
34	+ / − / custom amount	Only change the draft. Amount >0, exact decimal, correct unit; invalid disables Save and shows helper.
34	Add 250 mL	1.25 L +0.25 L =1.50 L →05 pending, no XP. Offline →18 queued state.
34	Custom 750 mL then save	1.25 L +0.75 L =2 L. Confirmed new completion →35 Water reward; queued offline never claims confirmed XP.
34	Cancel	05 unchanged saved value; discard only the entry draft.
05	Meditation +1 min	Add60 seconds once. Under10 min stays05 partial; confirmed threshold completion →06.
Duration entry	Open timer	33 cumulative-today timer. Baseline local total360 seconds; save only new unsaved elapsed delta.
33	Pause timer	36 paused; monotonic elapsed checkpoint preserved.
36	Resume timer	33 resumes the same checkpoint; no double counting prior time.
33 /36	Save progress and finish	Under target →05 partial,0 XP. At target →06 only after server confirmation; offline →18 provisional.
06 /35	Back to today	05 rebound:4/5 done,1,250 XP, correct habit completed. Other habit stays partial.
Reading / other quantity	Open quantity entry template	34 template bound to name, saved value, target and unit+pages rather than Water/mL. Native quantity component reused.
Global	Input / resource binding	Timer states show current total, not a second6-min increment. Reward template uses current habit/unit. Never award twice on retries.

IMPLEMENTATION CONTRACT · Every back route preserves the correct origin; every state binds real resource data.

03 · Habits, schedules and reminders

Documented routes and resulting states. No click/tap wiring is attached.

07 Library → 08 /09 Editor → 10 /11 Draft state → 07 Saved routine

Source	Action / trigger	Destination + guard + expected state
07	Search / category chips	Filter locally cached habits; no matches uses library EmptyState component.
07 /23 /22	Create a habit	08 editor.23 is first-run;22 keeps archived history.
08	Type / target / category	Update draft; binary target1, quantity exact decimal, duration whole seconds.
08	Create habit	Valid →07 canonical new routine; invalid target →24 with other choices kept.
24	Fix target to continue	Disabled until corrected. Valid draft returns08 Save/Create state; then07.
09	Save changes	Version-checked; success returns originating07/12. Stale edit →19 review, not silent overwrite.
08 /09	Schedule → Edit	10 schedule draft. Daily, weekdays, weekly distinct-days or anchored interval.
10	Use this schedule / Back	Commit to parent editor draft / cancel change. Parent Save is the server write.
08 /09 /20	Reminder → Edit	11 reminder draft, actual device permission state shown.
11	Open device settings	External OS settings; return11 reflects permission, no fabricated enabled-delivery state.
11	Enable / time / weekdays / Save	Save reminder definition and reschedule locally if permitted. Return origin09/20; denied permission still blocks delivery.
22	Restore routine	New active range today; success updates07/22 counts. Archived dates do not become missed.
Global	Archive and definition changes	Archive is reversible, deletion is not the same action. New target/schedule starts next eligible period; old history unchanged.

IMPLEMENTATION CONTRACT · Every back route preserves the correct origin; every state binds real resource data.

04 · History, insights and rewards

Documented routes and resulting states. No click/tap wiring is attached.

12 Habit detail → 13 History edit → Server reconciliation → 12 /14–17 Updated

Source	Action / trigger	Destination + guard + expected state
12	Choose calendar day	13 with selected local business date and effective target. Symbols distinguish complete/frozen/missed/not-due.
12	Month / calendar window	Reload the selected local window; never convert date cells to server UTC dates.
13	Edit or save past check-in	Validates30-day backdate +active range +version. Success returns12; offline queued18; conflicts19.
13	History / Today tabs	Switch visible log window while preserving unsaved draft.
14 /15	Week / Month tabs	14 /15. Only closed eligible periods enter consistency. Open current period stays pending.
Global tabs	Today / Habits / Insights / Profile	05 /07 /14 /20. Active tab follows destination; protected routes require owner session.
20	Level / XP details	16 confirmed ledger and published level formula. Offline projections are labeled provisional.
20	Freeze details	17 audited balance and usage, shared cap2.
17	Auto-protect switch	Future-effective opt-in setting. Never spend on open week or retroactively protect old misses.
12 /17	Protected period later completed	Reconcile once. Freeze is not XP; actual completion may refund at most once with cap-aware audit.
Global	Server-derived totals	3/5→4/5 after confirmed completion,1,240→1,250 XP. Level13,50/100 toward14. Monthly95/125=76%.

IMPLEMENTATION CONTRACT · Every back route preserves the correct origin; every state binds real resource data.

05 · Offline, sync and conflict recovery

Documented routes and resulting states. No click/tap wiring is attached.

05 Local save → 18 Durable queue → 19 Reviewed conflict → 05 /origin Confirmed

Source	Action / trigger	Destination + guard + expected state
Local logging	No connection	Write drift projection +outbox atomically. Show saved locally; no blocking spinner or lost work.
18	Connection restored / foreground	Bounded sync; per-mutation accepted/conflict/rejected. Drain pages before saying Synced.
18	Queued record conflicts	19 with local draft, canonical value and current server version.
19	Keep synced value −1.75 L	Discard only conflicting absolute draft, retain canonical and other pending work; return origin.
19	Use my value −1.50 L	New mutation against latest reviewed base_version. Another409 stays19 for another review.
19 import mode	Review backup difference	Keep current or adopt reviewed backup in import plan; return31. Do not prematurely write entire backup.
Network failure	Retry with original mutation ID	Immutable payload and durable receipt prevent duplicate logs/XP.429 uses Retry-After;5xx backoff.
Expired cursor	Safe bootstrap	Preserve unsent outbox, paginated snapshot then delta; no destructive full-table replacement.
Global	Session expiry / owner change	02 reauthentication; same owner can resume queue. Switching accounts isolates local records and outboxes.
State truth	Local saved ≠confirmed	Queued duration/quantity can look provisionally complete, but rewards settle only after accepted server reconciliation.

IMPLEMENTATION CONTRACT · Every back route preserves the correct origin; every state binds real resource data.

06 · Privacy, export, restore and deletion

Documented routes and resulting states. No click/tap wiring is attached.

21 Privacy → 29 /31 /28 Review → Ready /32 /Signed out → 21 /01

Source	Action / trigger	Destination + guard + expected state
20	Privacy and export	21 owner-only history and job status.
21	JSON /CSV format	Select export format; retain choice without submitting a job.
21	Request new export	202 →29 queued. Can leave safely; pending local mutations must sync first.
29	Job ready /failed	21 with Ready download /30 neutral failure. Polling is background state, not a fake instant download.
29	Back to privacy and export	21 while job remains queued.
30	Retry export / Back	29 new/retried job /21. Failure never changes history.
21	Download latest export	Ready +not expired +owned →private signed file/OS share flow. Expired queues a new export, not a broken link.
21	Restore from JSON backup	External file picker →validation →31 preview. Invalid file stays21 with precise error; no writes.
31	Review differences	19 in import-review mode. Return31 with plan; confirm remains disabled until conflicts resolved.
31	Confirm restore / Cancel	Resolved plan →server import job →32 results; cancel →21 with no data changes.
32	Back / View import audit	21 /private owner-scoped import receipt. Counts and per-item changes remain auditable.
21 /28	Delete account / Keep account	28 reauthentication and explicit consequence review /21 safe cancellation.
28	Delete account permanently	Recent valid authentication +202: revoke sessions, request purge, return01 with "Deletion requested; signed out." No premature purge-complete claim.
Global	Privacy / Terms /OS /email /download	External configured destinations, not fake internal screens. Authentication tokens never appear in exported files or URLs.

IMPLEMENTATION CONTRACT · Every back route preserves the correct origin; every state binds real resource data.
